

Key Features:

- Desktop (static) version of most Realtime360™ Packages
 - Weighing
 - Labeling
 - Dimensioning
- Flexibility to support a variety of interfaces, applications and technologies.
- Single packages easily expand to grow into WCS as needs increase.
- Manual Station can be re-purposed as reconciliation station if expansion leads to automation.

Benefits:

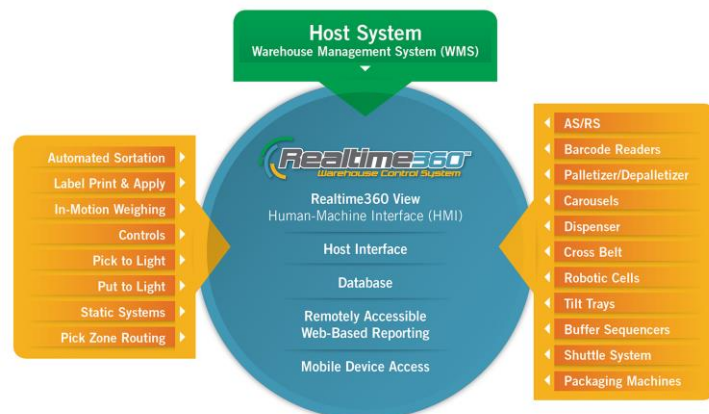

- Cost effective solution for lower throughput applications.
- Available with Network Interface or Stand Alone configurations.
- Interfaces to all:
 - Desktop Scales
 - Desktop Printers
 - Static Dimensioners
 - Bar Code Scan Guns
 - Hands Free Scanners
- Seamless integration with Realtime360 View™ HMI Graphic Diagnostic Packages
- Reduce manpower demand through semi-automation

System Overview

The **Realtime360 Static™ Suite** provides a cost effective solution for gathering and recording package information, weighing, labeling and dimensioning products. These manually operated desktop versions of our popular Realtime360 in-motion solutions offer configurable software for a variety of the applications most commonly required. The system can be easily tailored to meet unique, customer-specific needs.

Realtime360 Static works with all peripheral equipment including printers, scales, dimensioners and auto-ID (both hand held and hands free) and can communicate via serial or Ethernet connections. It is available in both networked and stand-alone configurations.

This easy to expand platform integrates seamlessly with BP Control's **Realtime360 WCS™** Warehouse Controls System and our entire suite of solutions, from in-motion weighing and label print and apply, to controls and sortation systems.

Specifications:

- Microsoft Windows-based Operating System
- Human Machine Interface (HMI) Software
- Microsoft Visual Studio .NET Development Environment
- Microsoft SQL Server Database

Options:

- Host Interface or Stand-Alone Configurations
- RFID
- Robust Reporting
- iCloud Connectivity

What functionality will your system need?

- Package Identification
- Weighing
- Dimensioning
- Label Printing
- Manifesting
- Rate Shopping
- Order Verification

Scale Types:

- Mettler Toledo
- Hi-Speed Checkweigher
- Bizerba
- Avery Weigh-Tronix
- Allen Bradley
- Quantronix
- Others

Scanner Types: (Hand Held or Fixed)

- Datalogic
- Sick
- Cognex
- Motorola
- Honeywell
- Others

Printer Types:

- Zebra
- Sato
- Datamax
- Intermec
- Epson
- Others

Dimensioner Types:

- Quantronix
- Mettler Toledo
- Datalogic
- Sick
- Allen Bradley
- Others

Interfaces:

- Stand Alone
- FTP
- TCP/IP Sockets
- ODBC
- Web Service
- RFC
- Custom
